I will add that, this is due to the next version that will probably be today. I'm also adding a cvar to delete the ragdolls, and a couple of other things _____ Veteran Member 07-03-2008 , 16:47 Re: Zombie Riot V1.0 #5 Did this work or could work on TF2? <yourgamedir><player><player><day><weapon><weapon><yourgamedir><player><player><day><weapon><weapon> Please give me some rep if you found this posted useful. :] Senior member 07-03-2008 , 16:57 Re: Zombie Riot V1.0 #6 yes. deleting ragdolls would be greate, cause 100 enemy corpses ... It's not good. And I have two ideas. 1 - classes for people. Right now combine your mod with PRGmod and it looks great! People kill zombies, get XP and upgrade your skills. Skills like doctor, regeneration, fires and more. It would be great if you applied lessons to people. If you want, you can contact me and we can discuss this together. 2 - the last zombie at the end of the day - be a unique boss with CVAR abilities such as HP, speed, gravity, model and other features. Are you thinking about that? Thanks for another great zombie mod! And I do plan on adding a boss I have special abilities and all these good things too _____ Veteran Member 07-03-2008 , 18:43 Re: Zombie Riot V1.0 #8 I could just edit the political class ctx and edit the models in it to match a Zombie, then you can encode the plugin to give it ai etc etc_____ Please give me some rep if you found it posted useful. :] Senior Member 07-04-2008 , 02:23 Re: Zombie Riot V1.0 #9 Quote: Originally Posted by Greyscale And I plan on adding a boss Will have special abilities and all these good things too awesome! If you look at the todo list, this is basically the changelog _____ All times are GMT -4. The time is now 19:24. Zombie Riot November 18, 2009 New 6 comments Zombie Rebellion is a zombie mod co-op in which you have to fight against the zombie hordes, in fact, you have to survive. If you want, you can call it a copy of Killing Floor. The only difference between the killing floor and this plugin for CS:S is that zombies do not have special abilities and weapons are what you buy (these models, D-Eagle, FA-MAS, Steyr AUG, after their real names). There is one more thing giving birth to terrorist sp (point brood) which I think, mappers can add it where they want so they can give birth where the map has T sp. Fortunately, I found some videos on youtube and I wanted to show you how the mod looks: As you can see in the video, there is a HUD in the bottom center of the screen that shows you the day (wave) that your team is in , the number of zombies left, left, name of the day that the owner has set and the number of people left (your teammates). I hope you guys will enjoy watching the video and also playing this mod. Thanks! No articles matching the specified criteria were found.
